

Senior PHP/MySQL Developer

We are looking for a senior PHP programmer. This is not a role for a web designer with some PHP skills... We are looking for a PHP programmer with some web-related skills.

Web skills: XML transformation, CSS/XHTML and Javascript. Browser-related programming would be only approx. 5-10% of your job.

The Ideal Candidate will be:

LAMP Programmer

Would have demonstrable skill-set with any industry leading RDBMS (Oracle, SQL Server, MySQL 5, Postgre) and fluency in SELECT statements writing and optimization, which includes SELECTs with embedded LIKE, JOIN and UNION constructs.

Understanding principles of the database programming (PL/SQL, T-SQL or MySQL) is a must, as we use both VIEWS and database functions / stored procedures.

Ability to do command-line database and Linux management is essential.

Able to Provide Real-life Intelligent Solutions

We would require you to work with technical and non-technical teams, so good communication skills, and the ability to understand, document and suggest solutions to problems is essential.

You must demonstrate an ability to read and create basic documentation to industry-standards, e.g. ERD, UML, algorithms and work flows are as important as quick code reading.

Use Good practices

Understanding of backup and replication issues is essential.

Linux architecture knowledge is essential.

Practical deploying and migrations of the LAMP applications is essential.

Education

- Degree educated (ideally Mathematics, Statistics, Programming or Social Sciences involving practical research) with PHP and SQL skills

And/or

- Zend Certified Engineer with fluency in SQL dialects

And/or

- SQL RDBMS DBA with PHP skills

Salary:

£35k-55k depending on experience

WE CAN ONLY CONSIDER APPLICANTS THAT ARE CURRENTLY FULLY ELIGIBLE TO WORK IN THE UK. Please do not apply if you are outside the UK or unable to work in the UK.
